

FIRE FIGHTING / BREATHING APPARATUS

Protection & Fire safety

FIRE FIGHTING

Both for maritime activities and terrestrial, SODIP Ltd is involved in the installation and maintenance of protection systems against fire.

Our services:

- Intervention in ships on fixed installations;
- Checking, charging and maintenance of fire extinguishers in offshore and onshore;
- Installing hose system;
- Sale of fire equipment and accessories.

AIR RESPIRABLE

* INSPECTION AND MAINTENANCE OF RESPIRATORS

The air-fed masks require regular maintenance. After the training of our technicians and installation of control equipment, we are approved as a control center for SCOTT and Honeywell.

Our equipment allows to perform functional and performance testing of masks:

- Sealing the mask and valves;
- Resistance to expiration;
- Flow regulator operation with holder;
- Cleaning masks ultrasonic tank.

During these inspections, some parts are changed systematically

* CHECKING THE AIR QUALITY

With the help of his air quality check device, SODIP can control the quality of the air distribution system Breathing used in industries and hospitals.

* MAINTENANCE AND CHARGING BOTTLES

- EEBD (Emergency Escape Breathing Divides)
- BA (Breathing apparatus)

* SALE AND CALIBRATION GAS DETECTORS

Calibration of multi gas detector and accessories (O₂, H₂S, Co LEL)
